Developmental Screenings Speech/Language

We will be offering developmental screenings at our school on **October 21st and 22nd .** Screenings are encouraged for children age 3 years and older to help identify difficulties with speech/language skills or children at any age who may have concerns in these areas of development. Early identification of a delay can avoid later academic and social difficulties.

The screening will be conducted by certified, licensed speech language pathologists and occupational therapists from Capital Therapy Group. The following areas will be assessed:

Articulation: ability to say specific sounds
Receptive Language: ability to remember and understand information, follow directions, answer questions
Expressive Language: sentence length and structure, and ability to organize information to get message across
Social-Interaction: play skills, conversational skills, turn-taking, perspective-taking
Fluency: minimal amount of repetitions and interruptions in the flow of speech
Voice: appropriate pitch, volume and quality

If you would like for your child to participate in the screening, please fill out the information below and return to your child's teacher or complete the form on our website, www.capitaltherapygroupaustin.com and submit with your credit card information **by October 21, 22.**
